FARM MANAGEMENT SYSTEM

PHASE 3 – PROJECT DESIGN PHASE

1. Problem–Solution Fit

The FMS replaces manual farming records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely agricultural insights.

2. Proposed Solution

- Problem: Manual maintenance of farm, crop, farmer, and buyer records leading to errors, data loss, and delays.
- Solution: Salesforce-based Farm Management System with centralized data storage and automation.
- Innovation: Automated data entry validation, cloud storage, and real-time reporting dashboards.
- Impact: Improved data accuracy, faster reporting, and better decision-making for farmers and managers.
- Business Model: Digital farm management and agricultural data services platform.
- Scalability: Supports multiple farms, users, and regions with cloud-based infrastructure.

3. Solution Architecture

- Presentation Layer – Salesforce Lightning UI
- Application Layer – Validation Rules, Relationships
- Data Layer – Custom Objects
- Analytics Layer – Reports and Dashboards
