FARM MANAGEMENT SYSTEM

PHASE 6 – FUNCTIONAL & PERFORMANCE TESTING

1. Testing Overview

During the testing phase, screenshots were captured from the Salesforce interface to verify system functionality.

2. Functional Testing

- Creation of Farm, Crop, Farmer, and Buyer records.
- Validation of input fields.
- Relationship and dependency checks.
- Profile and role access testing.
- Sharing rule verification.
- Report and dashboard generation.

3. Performance Testing

Performance testing ensured smooth system response and stability during multiple user operations.

4. Testing Objective

The testing phase verifies that the configured Farm Management System functions correctly across data entry, relationships, access control, sharing, reports, dashboards, and multiple-user operations.
